---

I am a **frontend programmer with 5 years of experience in fullstack development for web and mobile applications**. Previously, I worked as a full stack programmer.

In my free time, I have developed **several web and mobile applications** for personal use and a wider audience, with most projects **published on my GitHub profile**.

As the **deputy event manager and marketing manager**, I was part of the organizing team for Majske igre 2024, where I **gained valuable experience in team management and communication** with partners.

---

## EDUCATION

**Faculty of Computer and Information Science, University of Ljubljana**
inderdisciplinary master's study programme Multimedia (2021 - )

**Faculty of Computer and Information Science, University of Ljubljana**
Bachelor of Science, Computer and Information Science

---

## WORK EXPERIENCES

**Majske igre**                                                                                                      **2024**
**DEPUTY EVENT MANAGER AND MARKETING MANAGER**
As the deputy event manager, I led a 13-member organizing team for a project valued at €200,000, attracting between 30,000 and 40,000 visitors annually. In this role, I coordinated various sectors, including technical and hospitality, and managed communication and negotiations with sponsors and partners.

Highlights:
- Acquiring sponsors, preparing sponsorship offers and plans
- Communication with sponsors and partners
- Coordination of the PR department and management of social media
- Preparation and editing of sponsorship and other contracts
- Supervision of the cash register system
- Development of a web application using NuxtJS and DecapCMS, development of a mobile application using Flutter

**Medius d.o.o.**                                                                                  **July 2022 - today**
**FRONTEND DEVELOPER**
As the lead frontend developer, I spearheaded business application projects for prominent companies including Loterija Slovenije, Telekom Slovenije, and the Supreme Court of the Republic of Slovenia. My work primarily involved development using the Angular framework.

Highlights:
- Custom web application development
- Leading frontend developers on the project (code reviews, assistance, task allocation, etc.)
- Development of an internal UI library
- Mentoring junior frontend developers

**Mahle d.o.o.**                                                    **2021 and 2019**
BUSINESS INFORMATICS DEVELOPER
Development and enhancement of internal business informatics as part of a summer internship.

Highlights:
- Development of fullstack systems
- Development of Oracle database scripts
- Technologies used: HTML/CSS/JavaScript, Java, and Oracle database

**Omega Consult d.o.o.**                                            **2020 - 2021**
BUSINESS SYSTEMS DEVELOPER
As a custom fullstack business systems developer, I have worked with clients such as DRSI and AVP.

Highlights:
- Scripting at the Oracle database level
- Fullstack development of business applications (database, backend, frontend)
- Deploying systems in test and production environments
- Backend technologies used: Java, SpringBoot, Oracle database
- Frontend technologies used: Angular, HTML/CSS/JavaScript, TypeScript

**Špacapanova hiša d.o.o.**                                         **2018 - 2023**
HEAD OF PUBLIC RELATIONS
Manager and administrator of the company's website, social media, and overall online presence, which today holds a Michelin Green Star.

Highlights:
- Creating web content
- Designing and managing the company's website
- Designing and managing the company's online image

---

# OTHER EXPERIENCE AND HIGHLIGHTS

**Student council of residents (Študentski svet stanovalcev ŠDL)**
Since 2021, I have been active in the Student Council of Residents at the Student Dormitory Ljubljana, which unites 7,500 students. In 2022, in addition to being a member, I took on the **leadership of a working group** that addressed social, housing, and other current issues of the residents. In 2023, **I assumed the role of Deputy President of the Student Council of Residents**.

**Local Politics**
In 2022, I was elected as a **member of the Municipal Council of the Municipality of Miren-Kostanjevica** and a member of the Local Community. In my work, I focus on the status of young people in the municipality - I took over the newly established Youth Committee. **Based on the work of the committee, the municipal council adopted the first municipal youth strategy** in 2024, of which I am a co-author.

**Personal Projects**
Most of my personal projects or projects developed in my free time for clients are available on my GitHub page. Highlighted projects:
- **Student Council of Residents Website** (NuxtJS, DecapCMS, GitHub Actions): A static site with content editing capabilities.
- **Majske igre Website and Mobile App** (NuxtJS, DecapCMS, GitHub Actions; Flutter): A website and mobile application for the May Games event.
- **MojŠtudent Mobile App** (Flutter): An app for the residents of the Student Dormitory Ljubljana, providing access to dormitory services.
- **MarelaBudget Web App** (Angular and SpringBoot): A system designed for personal finance management.
